#### About The Conference

**Education 4.0** refers to the shift in the Education sector in response to Industry 4.0 where digital transformation is impacting the ways in which the world of work and our everyday lives are becoming increasingly automated.

In the applied degree sector, significant change and transformation is occurring as leaders, educators and partners evolve SMART campus environments to include blended learning, artificial intelligence, data analytics, BYOD (bring your own devices), process automation and engage in curriculum renewal for and with industries and professions.

## Aim & Scope of the Conference

This Conference seeks to evolve a global community of practice to share case studies, engage in critical discussion and spearhead thought leadership to address the paradigm shift in new generation educational practice. Increasingly, institutions across the applied degree sector are addressing technology and innovation as the triggers to transform higher education to ensure more fit for purpose outcomes in preparing students for the world of work and life-long learning.

The Conference aims to profile and enhance the contribution of applied educational practice and research particularly in the applied degree sector as it relates to the future of work.

Selected Conference Papers will be included in an independent volume on Education 4.0, published by Progressive Publications as a post-conference edited book.
